DESERT WARFARE: A SELECTIVE BIBLIOGRAPHY

Until the Iraqi invasion of Kuwait in August 1990, the United States Army had not been directly involved in desert warfare since the North African campaigns of World War II. Current knowledge of desert warfare or desert operations has had to be gleaned from several sources. One of these sources has been the experiences of the Israelis in their conflicts with their Arab neighbors, the crisis in Lebanon, and the ill-fated Iran hostage rescue attempt. More immediate hands-on knowledge about desert operations has come from various training exercises and deployments of U.S. armed forces to desert regions in the United States and overseas.

The purpose of this bibliography is to provide a listing of books, journal articles, and technical reports currently available at the United States Army Aviation Center Technical Library on desert warfare. This bibliography was prepared in response to patron demand for information that was immediately available in the library on desert warfare, tactics, experiences, survival, and the effects of desert environment on men and machines. The period covered by this bibliography is 1945 to the present. All references are available at the USAAVNC Technical Library, Building 5906/5907, corner of 23rd and 5th Avenue.
